DOB: 01/08/1982

Introduction

Hello, my name is Halison Casimiro, and I am an IT professional with over 20 years of experience in project management, front-end and full-stack web development, and IT management. I have a diverse educational background and a proven track record of success that spans many years.

In 2007, I earned my Licentiate & Bachelor degree in Information Technology. In 2010, I completed two diplomas in Australia, one in Management and Marketing and the following year another in Information Technology, both at Certificate IV level (AQF - Australian Qualifications Framework). In 2018, I became a specialist in Project Management, with a postgraduate degree from IESB (Institute of Higher Education of Brasília).

Throughout my career, I have held a variety of IT-related positions, starting in 2001 as an IT Analyst at IBM. From 2006 to 2008, as an IT Consultant, Interaction Designer and Analyst at UNDP (United Nations Development Programme). From 2011 to 2014, I served as a Senior Front-end Web Developer and Technical Lead at ICMBio (Chico Mendes Institute for Biodiversity Conservation). Then, I worked as an IT Manager and Web Specialist, Senior Military Temporary Technical Officer at the Brazilian Army from 2014 to 2022. Most recently, I worked as a Senior PHP Full-stack Developer at Ibrower Consultant from 2022 to 2023. All of my web experiences have focused on prioritizing accessibility and adhering to the W3C and WCAG guidelines.

Over the years, I have developed strong communication, problem-solving, and analytical skills, and I am committed to delivering exceptional work in every role I take on. Whether working independently or as part of a team, I am dedicated to achieving project goals, meeting deadlines, and exceeding expectations.

As a second language, I possess confident, articulate, and professional speaking abilities in English. I have also proven my adaptability to differing cultural and business environments.

Thank you for taking the time to review my resume. I look forward to the opportunity to discuss my qualifications and how I can contribute to the company.

- **Plone for Web Developers (Python programing)**

Simples Consultoria - SP

Brasília, DF, Brazil – 2006

Experiences

- **Ibrowse**

TI Consultant Company.

Senior Full Stack Web Developer

As a full-stack PHP developer, applications were developed, configured, and installed, and systems were integrated to provide web solutions for clients. Proficiency in PHP (using Yii or Laravel Frameworks) and JavaScript (including Typescript front-end frameworks) enabled the delivery of robust and scalable web applications.

To ensure codebase quality and reliability, GIT and SVN were utilized for code version control, and unit coding testing (PHPUnit and Sonar) was performed. Additionally, agile, GLPI, and SCRUM methodologies were employed for project management, ensuring efficient and effective delivery of high-quality solutions to clients.

Skills in analysis and UX design were applied, with a focus on accessibility and adherence to the W3C and WCAG guidelines. This facilitated the creation of intuitive and user-friendly web applications that met the needs of clients and their customers.

The goals as a full-stack PHP developer were to achieve the following objectives: The company's revenue was aimed to be increased by obtaining a minimum of 30% increase in Total Sales Units (TSU) through successful implementation of web solutions that met clients' needs and exceeded their expectations; Timely delivery of projects was ensured by completing sprints five days ahead of the deadline. This allowed effective management of client expectations and establishment of a reputation as a reliable and trustworthy partner for web development requirements.

By achieving these goals, contributions were made to the growth and success of the company, while also enhancing skills and knowledge as a full-stack developer.

Remote, Brazil – apr 2022 ~ may 2023

- **Brazilian Army (EB)**

Senior lieutenant.

- Full-Stack Web Development Lead - Technical Military Officer**

I was a Technical Officer Lieutenant in the Brazilian Army, as a Full-stack Web Development Lead with a Professional Higher Diploma for IT and Military Services, where I managed technical activities specializing in Information Technology. My primary responsibility was to track and follow up on projects, ensuring that all required data, forms, presentations, and other documentations were clear, complete, and concise.

I interacted with regular communication, good interpretation, persuasion, and discretionary skills. I had daily contact with all levels of management, often dealing with confidential information. Independently, I prioritized, organized and delegated workloads/assignments, ensuring that all team members had clear direction and were held accountable for their work.

As a point of contact for project team programs and projects, I was responsible for ensuring that all team members had access to the necessary resources to complete their work on time and within budget. I used technologies such as PHP, GIT, YII2, LARAVEL, ANGULAR, TypeScript, front-end, Scrum, Agile, APIs REST, VMs, and Jira to develop, deploy and maintain web applications and software focused on accessibility and adhered to the W3C and WCAG guidelines.

In this role, I led and mentored other web developers, ensuring that they had the necessary skills and resources to grow professionally. I was responsible for developing and maintaining technical standards, best practices, and guidelines. Additionally, I was responsible for ensuring that all team members adhered to these standards and guidelines, promoting consistency and quality across all projects.

Brasília, DF, Brazil – mar 2014 ~ mar 2022

- **ICMBio – Chico Mendes Institute for Biodiversity Conservation.**

The Brazilian government department of natural resources.

- Senior Front-end Web Developer and Technical Lead**

As a Senior Front-end Web Developer and Technical Lead, I was responsible for leading the technical team and developing an efficient process for meeting demand. This included monitoring Redmine management tools and controlling versions using SVN.

I executed the architecture and development of the Institutional Portal using a content management system. I implemented a user control system (ACL) and developed several systems and extensions using the Joomla! framework architecture (PHP + MVC).

I implemented a model for creating multi-sites using UNIX symbolic links, managing and programming more than 50 websites using the Joomla! CMS.

I worked on the architecture and reprogramming of legacy systems and the Intranet. I categorized a large set of content and implemented a complex user access control organization.

Brasília, DF, Brazil – set 2011 ~ mar 2014

- **Your IT Help Australia**

Agency specializing in strategic online advertising and promotions.

- Interact Designer and Senior Web Developer**

As a Senior Full-stack Web Developer and Interaction Designer, I managed digital web projects from inception to delivery, working with clients to determine their web development needs, creating project timelines and budgets, and ensuring timely completion of deliverables within the allocated budget.

In addition to project management, I conceptualized, designed, and developed websites and portals that met the requirements of our clients and their customers. I ensured the accessibility, usability, and compliance with industry standards for XHTML/HTML, JavaScript, and CSS of all web applications.

Having specialized in CMS Joomla, Wordpress and Magento, I utilized my extensive experience to develop customized web solutions for clients across various industries. This involved designing and developing custom templates, modules, and plugins that improved Joomla's functionality and facilitated efficient web content management for clients.

In my role as a Web Analyst and Javascript expert, I analyzed web traffic and user behavior to identify areas for enhancement in our clients' web applications. This involved conducting A/B testing, user surveys, and other research methods to gain insights into user preferences and behavior. Leveraging my expertise in Javascript, I developed custom scripts and tools that enhanced the functionality and user experience of our clients' web applications.

Overall, my objective as a Senior Full-stack Web Developer and Interaction Designer was to deliver high-quality web solutions that not only met but exceeded our clients' expectations. With my extensive experience in web development and interaction design, I was confident in my ability to assist our clients in achieving their digital goals and fostering online business growth.

Newtown, NSW, Australia – 2008 ~ 2011 on-site and 2012 ~ 2023 remote

▪ **UNDP - United Nations Development Programmer**

The United Nations' global development network

IT Consultant, Interaction Designer and Analyst for the Brazil Federal Council

As an IT Consultant, Front-end, and Interaction Designer, I was responsible for developing front-end interfaces for various web applications. In addition, I assisted in the implementation and management of systems developed in ZOPE/Plone, conducted system analysis, designed information architecture, ensured accessibility and usability compliance.

One of my major accomplishments was executing the implementation of various open-source software systems on the GNU/Linux platform for several Legislative Chambers throughout Brazil. To achieve these results, I utilized a range of technologies, primarily focused on open-source software such as GNU/Linux, Zope, Plone, **Python**, ZPT, SGBD, MySQL, AJAX, HTML, CSS, and web standards according to the W3C.

My role also required me to stay up-to-date on new technologies, best practices, and industry standards to offer clients the best solutions possible. Additionally, I collaborated with cross-functional teams, including back-end developers, designers, and project managers, to ensure seamless integration and optimal user experience.

Brasília, DF, Brazil – FEB 2006 ~ OCT 2007 and JAN 2008 ~ SET 2008

▪ **Poliedro Development, Consulting and Services Ltd.**

Computer Software and consultant industry

Senior Interactive Designer and Front-end Developer

- Programming layout JAVA, ASP.NET, Ext JS and Web Front-end
- Designer Architect, Web Standards, Usability and Accessibility
- Software Analyst, Usability Research & Testing

Brasília, DF, Brazil – 2005 ~ 2006 and NOV 2007 ~ DEZ 2008

▪ **Brazilian Ministry of Social Development and Fight Against Hunger**

Government Agency ; Government Administration industry

Senior Web Producer and Developer

I worked as a Web Analyst and Web Developer, responsible for analyzing systems and interface requirements and developing using a CMS management system (Zope/Plone) for the portals <http://www.mds.gov.br>, <http://www.fomezero.gov.br>, and Intranet.

In this role, I conducted taxonomy analysis, specifications, interface programming, and analysis of GNU/Linux, Zope, Plone, Python, ZPT, SGBD, MySQL, AJAX, HTML, CSS, and W3C web standards.

My main tasks included analyzing and developing web-based systems and interfaces, implementing website layouts, creating web pages, and ensuring that the websites met the client's requirements and specifications. I also conducted testing and debugging of web applications and collaborated with the team to ensure the timely delivery of projects.

Overall, my role as a Web Analyst and Web Developer required a strong understanding of web development technologies, programming languages, and standards, as well as excellent analytical and problem-solving skills.

Brasília, DF, Brazil – out 2004 ~ fev 2007

▪ **IBM Global Business Services**

Information Technology and Services industry

IT Analyst subcontracting by Carrefour S.A.

As a sub-contracted IT Specialist for Carrefour S.A, I configured, analyzed, customized, and migrated their commercial automation systems. I implemented and maintained the technical aspects of the systems, resolved issues, and ensured smooth operation. I collaborated with the team to improve and customize the systems, oversaw their migration to new platforms, and prioritized efficiency. With strong technical and problem-solving skills, I played a critical role in Carrefour S.A's successful automation operations.

Brasília, DF, Brazil – 2001 ~ 2002

▪ **Brazilian Presidency**

Government main agency

IT Junior analyst subcontracting by NOVADATA

- Responsável pela manutenção da rede, fez todo o gerenciamento e migração de sistemas no evento *Bug do Milênio*.

Brasília, DF, Brazil – 1999 ~ 2000

Awards

- As a web developer, I was part of the team that won the Gold Pollie Awards for Digital/Social Media Campaign at AAPC 2023.
Gold: Campaign: *Leila do Vôlei for Governor*; Agency: *ESPLANADA Comunicação Estratégica*.

Others

Experiences

▪ **International Olympic Committee - (2016 Summer Olympics)**

Volunteer as an International relations team member.

Amazing experience as a member of the International Relations team at the 2016 Olympics in Rio!

Volunteering at the Olympics was an incredible opportunity to be part of a historic global event. Having English as a second language gave me the opportunity to be a member of the International Relations team. I was able to help create an atmosphere of friendship and cooperation among athletes, coaches, and fans from around the world. I learned so much about the culture and traditions of other countries and made friendships that will last a lifetime.

The Olympics are a symbol of global unity and the human spirit. I am incredibly grateful to have had the chance to be part of this once-in-a-lifetime experience.

▪ **BRB – Brasília Bank**

2003

Banking automation Specialist.

▪ **Softway**

2002 ~ 2004
